

# KAIROS INSIGHTS

Connecting Technology to Business  
To Align Product, Marketing, and Sales

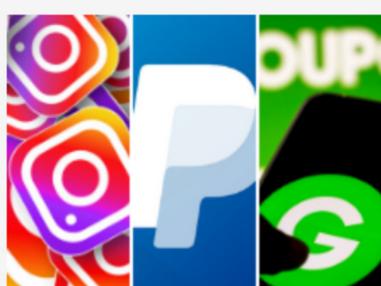

Hi Ratika,

Welcome to **KAIROS** Insights, a newsletter in which we curate stories that talk about how technologies are making a business impact and discuss strategies that help sales, product, and marketing get aligned. In this issue, our newsletter talks about the primary reason behind the failure of most start-ups. Research shows that 42% of businesses fail because they have no market for the products they are selling. This is why finding a product-market fit is such an important exercise early in your entrepreneurial journey. Our theme for the month is #WhyMarketMatters, and all our stories talk about product-market alignment.

Once again, we have linked our podcast - **Alyment**, where we go beyond buzzwords and connect the dots between technology and its real-world impact. Here, you can see **our featured episode with Dr David Shulkin**, Former Secretary of Veteran Affairs, who has been at the forefront of the COVID crisis and is seeing the quick adoption and impact of telehealth. I was absolutely honoured to speak with him about his work and learned a lot from our conversation.

Stay safe!

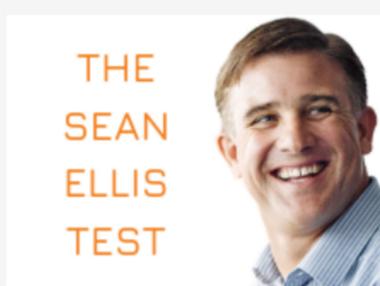

Ashish Jain  
CEO & Co-founder,  
**KAIROS Pulse**

### 3 companies that got Product-Market Fit wrong and made it right

### Podcast: Dr. David Shulkin, Former Secretary of Veteran Affairs, talks about telehealth in the times of COVID-19

Historic legislations are passed, and billions of dollars are committed by the government to prepare health practitioners deliver virtual care. But is the healthcare ecosystem ready for a change? And if so, can it scale in a sustainable manner? In this episode we speak to someone who is an experienced healthcare professional, watching the advancement of telehealth unfold from very close quarters.
